

LEED AND GREEN BUILDING

LEED Coordination for new construction, existing buildings, and homes

- Design charrette
- LEED scorecard generation and management
- LEED coordination for project team
- LEED coordination for General Contractor points
- LEED Online submittals
- LEED fundamental and enhanced commissioning
- LEED facilitation for construction team
- Air quality planning and testing
- Construction waste planning and coordination
- Erosion control inspections
- LEED for Homes Green Rater services

Other certifications such as ENERGY STAR, Green Globes, or Earthcraft

- Design Charrettes – Facilitate integrated teams to create innovative designs
- Owner's Project Requirements - Document your vision for sustainability

Assessments – energy, water, or materials and waste for your building

- Energy Efficiency:
 - Building envelope improvements (insulation, air sealing)
 - HVAC modeling, improvements, and recommendations
 - Lighting retrofits
 - Solar and renewables modeling and consultations
- Water Efficiency
 - Low-flow analysis and fixture options
 - Landscaping water use reduction
 - Rainwater collection and reuse
- Materials Efficiency
 - Purchasing and waste assessments
 - Waste prevention (source reduction and composting programs)
 - Recycling programs (Commercial and Construction & Demolition)
 - Specify recycled, regional, and renewable content products
 - Develop green purchasing programs and measurements

Wilmot can improve your indoor and outdoor environments:

- Indoor air quality:
 - Specify low VOC paint, carpet, and adhesives
 - Recommend products for healthy interiors
 - Develop green cleaning programs
- Sustainable landscaping
 - Design LID devices, such as raingardens and bioswales
 - Specify native and drought tolerant species
