

BRYAN HENDRY

PROJECT MANAGER, WILMOT INC.

Bryan combines years of experience as assistant chief inspector for multi-million-dollar construction installations and a passion for the outdoors to support the mission of Wilmot Inc.

Education
Forestry
Environmental Science
Jones Junior College

Growing up in his family's timber business in Mississippi, Bryan developed a natural love for the outdoors and the environment. His affinity for remembering species of different plants and trees guided him through an understanding of the land. He was also raised in the construction and carpentry business, and he used his knowledge of nature to learn how to build around and on it. Bryan has a unique perspective on forestry and natural resources, a talent he brings to every project.

Bryan's knowledge of forestry in natural land resources and nationwide inspection experiences throughout his career played a large role in how he came to Wilmot. Upon moving to Nashville with his wife, Ashley, Bryan found that he connected with the integrity and mission of Wilmot Inc.

Bryan joined Wilmot as a utility resident project representative for the Clean Water Nashville sewer rehabilitation projects. He has since been a part of the Sevenmile project for the installation of manholes and a mainline pipe liner, as well as the Foster Avenue project.

Notable Projects:
Clean Water Nashville
Nashville, TN

Oversaw sewer rehabilitation projects for Clean Water Nashville. This included completing the Sevenmile project, which included installing a 15"- 36" diameter mainline pipe liner, air-to-steam installation, and water shots. The project also entailed rehabilitating manholes and renewing laterals with new Cleanouts and relays. The project successfully removed substantial quantities of groundwater from the metro system.
