

# CHRIS WILLIAMS

PROJECT MANAGER, WILMOT INC.

Chris' passion for the outdoors, combined with his prior experiences in public service, help him thrive while managing projects and leading fellow team members.

## Education

Bachelor of Arts  
International Affairs  
Concentration in  
Public Administration  
Florida State University

Growing up in Florida, Chris spent every summer exploring Islamorada and the surrounding Florida Keys with his family. Chris remembers the gradual degradation and bleaching of Alligator Reef as the point at which he realized how fragile the environments around us can be. From there on, Chris became interested in the importance of protecting and preserving the environment.

Working in the restaurant business and for the USPS taught Chris to pay greater attention to details. His keen eye for detail is essential to his work as a project manager and inspector.. As a Stock and Delivery Coordinator in the restaurant business, Chris gained experience managing numerous projects simultaneously, which has translated directly to his role as a project manager for LDA's sidewalk improvement and construction projects.

Chris joined Wilmot as a field technician for the company's trunk walking assessment on behalf of Clean Water Nashville. He has worked with Leif Watkins and Jack Sweeney while trunk walking. Chris was also responsible for training Thomas Rowland to assess the ADA sidewalk data collection for LDA.

## Notable Projects:

### Sidewalk/Bikeway Data Collection (LDA) Nashville, TN

Project Manager of multiple sidewalk construction and improvement projects for LDA.

Collected data through surveys of sidewalks and bikeways and trained others to do so.

Coordinated with fellow Wilmot field techs and data analysts to assess traffic patterns.

### Clean Water Nashville Trunk Walking Nashville, TN

Led fellow team members in trunk walking efforts for Clean Water Nashville.
