If you live or work in Nashville, your life has undoubtedly been touched by Wilmot Inc.'s contribution to projects like Let's Move Nashville and Music City Solar to smaller scale projects like the Metro Water Services' Energy Management Program. Wilmot is an innovator in saving resources and money through sustainable and low-impact solutions. Tiffany and her team provide clients with high performance approaches to improve health, protect the environment, and save money.

Since 1994, she has helped organizations including GM, the US Army, Metro Nashville, Coors Co. and NES enhance bottom line growth while developing world-class systems that improve resource use efficiency. Ms. Wilmot also advocates for sustainable practices in a variety of groups. She has been selected by two administrations to work with the Mayor's sustainability and livability committees. Ms. Wilmot co-founded TN Women in Green (TWIG), an organization that empowers, inspires, and connects women committed to environmental sustainability. Additionally, she has been invited to teach at Vanderbilt and Lipscomb University.

Her background in business and environmental stewardship has allowed her to make a significant impact by advocating for the incorporation of sustainability considerations in every project she has been involved in.

Notable Projects

Let's Move Nashville's Transportation Improvement Program
Nashville, TN

Conducted a triple bottom line analysis to quantify economic, social and environmental impacts of the proposed transportation improvement plan.

Central WWTP Optimization

Metro Water Services, Nashville, TN
Developed a sustainability plan and provided design support for a large wastewater treatment plant upgrade

Overflow Abatement Program

Metro Water Services, Nashville, TN
Provided design support, inspection services, and investigated opportunities to reduce overflows and reduce inflows to the municipal sewer system as a part of the city's 11-year overflow abatement program.

West Park Equalization Tank

Nashville, TN
Analyzed the addition of an EQ tank and advised on park improvements to Nashville's West Park in a triple bottom line analysis.

Metro Nashville Zero-Waste Master Plan
Nashville, TN

Identified and engaged key stakeholders by forming a task force to inform the planning process. Advised on how to best enhance social and environmental benefits through effective waste management.

Mayor's Livable Nashville Committee
Nashville, TN

Serving Mayor Barry on the Green Building committee to develop recommendations to make Nashville the "greenest city in the Southeast."
